WHO ARE WE?

🟦 WHY Sirin?

Founded in 2018, Sirin Diagnostics is a trusted manufacturer of high-quality rapid diagnostic test kits.

Through innovation, scientific expertise, and a strong commitment to quality, we deliver reliable diagnostic solutions that serve healthcare providers in Egypt, the Middle East, and Europe.

With internationally recognized certifications (ISO 13485:2016 and CE Mark), our products are designed to ensure accuracy, sensitivity, and long-term stability – supporting healthcare systems in the fight against diseases and epidemics.

🟦 Sirin VALUES

- **Quality**

We are committed to producing diagnostic kits of the highest standards, ensuring accuracy, sensitivity, and durability across all our products.

- **Innovation**

We continuously invest in R&D to develop cutting-edge solutions and provide customized services that address global healthcare challenges.

DIAGNOSTICS

20/21 3rd industrial sector 2nd Cell Plot E
Matahra Industrial City - Minia - Egypt

- **Reliability**

Our tests are robust, certified, and optimized to withstand extreme conditions, ensuring consistent performance and dependable results.

- **Customer Focus**

We partner with healthcare providers and distributors, offering support, collaboration, and tailored solutions that meet real-world diagnostic needs.

Our Products :

Women's Health & Fertility:

- HCG Pregnancy Test Cassette
- U-TEST Pregnancy Test
- U-Test Pregnancy Test Strips
- BabyCheck Pregnancy Test

Infectious Diseases :

- H. Pylori Ag Test Cassette
- H. Pylori Ab Test Cassette
- HAV IgG/IgM Rapid Test Device
- HIV Rapid Test Cassette
- HBsAg Rapid Test Cassette
- HCV Rapid Test Cassette
- Syphilis Rapid Test
- Malaria P.f Rapid Test Device
- TOXO IgG/IgM Rapid Test Device
- CMV IgG/IgM Rapid Test Device

Gastrointestinal & Inflammatory :

- FOB (Fecal Occult Blood) Test
- Calprotectin Rapid Test

Cardiology :

- Troponin I Rapid Test Cassette :

Drugs of Abuse

- Multi-Drug 7 (COC, AMP, THC, MOP, TRA, BAR, BZO)
- Multi-Drug 4 (THC, MOP, TRA, BZO)
- (THC) Rapid Test Cassette
- (TRA) Rapid Test Cassette
- (MET) Rapid Test Cassette
- (K2) Rapid Test Cassette
- (PGB) Rapid Test Cassette
- (GAB) Rapid Test Cassette

Siri Disc

Antibiotic Susceptibility Testing

Rapid • Reliable • Ready-to-Use

Siri Disc is a complete system for testing bacterial susceptibility to antibiotics, designed for in vitro laboratory use. It uses the well-known Kirby-Bauer method to determine the effectiveness of each antibiotic against bacterial samples.

Key Features

- **Accurate and reliable results based on international CLSI/EUCAST standards**
- **Easy to use with clear step-by-step instructions**
- **Ready-to-use – each 50 discs are individually packaged to preserve effectiveness**
- **Comprehensive coverage for most bacterial infections**
- **High-quality manufacturing following latest diagnostic technologies and EU standards**

Allergen Panels Covered

Food Panel
Shrimp • Fish • Crab • Hazelnut • Walnut • Peanut • Sesame • Cashew • Soybean • Banana • Strawberry • Egg • Milk • Mango • Gluten

Animal / Dander Panel
Cat hair • Feathers • Wool

Insect Panel
Fly • Cockroach • Mosquito • Ant

Environmental Panel
Pollen • Grasses • Rice husk • Fungi • Nicotine

Microbiology Culture Media

At Sirin Diagnostics, we provide a wide range of high-quality culture media designed for accurate and reliable microbiological diagnostics. Our products are developed to meet international standards and support laboratories in delivering precise results

Our Main Media:

MacConkey Agar
Selective & differential medium for Gram-negative enteric bacteria.
Lactose fermenters: pink colonies - I Non-fermenters: colorless colonies

Nutrient Agar
General-purpose medium supporting a wide range of bacterial growth
- Colonies appear in natural color

Mueller-Hinton Agar
Standard medium for antibiotic susceptibility testing (Kirby-Bauer)
- Clear and reproducible results

Sirin DIAGNOSTICS
20/21 3rd industrial sector 2nd Cell Plot E
Matahra Industrial City - Minia - Egypt

CLED Agar
Designed for urinary pathogens
- Fermenters: yellow colonies I Non-fermenters: blue/green colonies
- Prevents Proteus swarming

SS Agar
Selective medium for Salmonella & Shigella
- Salmonella: colorless with black centers
- Shigella: colorless colonies
- E. coli: pink colonies

Backed by strict quality control, our culture media ensure consistency, reliability, and confidence in diagnostic microbiology

Certifications

- Sirin Diagnostics is a GMP certifi9ed Facility By Egyptian Drug Authority
- ISO 13485:2016 Certified Facility
- Registered with Saudi Food and Drug Authority ‘
- Sirin Diagnostics Products are CE marked and meets the EU standards For IVDs
- All the products are registered with Spanish MOH
